JGD7000D-CA Cyanoacrylate Dispenser

Jensen Global's cyanoacrylate dispensing system is specifically designed to dispense instant adhesives straight from the manufacturer's 1 lb (500 gram) bottle. This contained system reduces the exposure to the cyanoacrylate fumes and is extremely easy to maintain and clean.

Using the JGD500S digital controller with the JGD700D valve allows for accuracy and precision dispensing of low and medium viscosity CA's, and some flowable CA gels. The valve has a stroke adjust, giving you the ability to dispense very controlled amounts of material without any dripping.

Features and Accessories Included:

-  JGD500S Digital Shot Meter Controller & Footswitch
-  JGD1LB Pressure Tank for 1 lb / 500g bottle of CA
-  JGD700D Precision Diaphragm CA Valve with Stroke Adjust
-  JGD4000-GSO Adjustable Valve stand
-  Needle samples

JGD500S Specifications

Dimensions W x H x D
4.50 x 6.25 x 7.75"^{mm}
11.4 x 15.8 x 19.9 cm

Weight
2.1 lbs (.95 kg)

Power Supply
Input 100-240VAC
Output 24VDC 1A

Timer Range
00.007 to 99.99 seconds

Air Input
35-100 psi (2.4-6.9 bar)

Air Output
1-100 psi (0.1-6.9 bar)

JGD1LB Specifications

Dimensions
Height: 9" ID: 3"

Weight
3.1 lbs

Max Pressure
80 psi

JGD700D Specifications

Dimensions
Length: 3.1" OD: .936"

Weight
2.38 oz.

Options

Needle Kit
JG120NK
